Depicted is the trailer fabricated to the specifications and standards of Advanced Safety Products [ASP]. The fully welded box tube steel is powder coated Cal-Trans Orange. The trailer is equipped with hydraulic surge brakes, torsion axles, telescoping support arms, custom boxes for controls and equipment, and plates to mount the equipment that ASP will install. A sign post and computerized sign is added along with control equipment, hydraulics, and power supply. The trailers are then sold or rented for highway safety uses.
